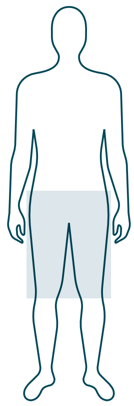
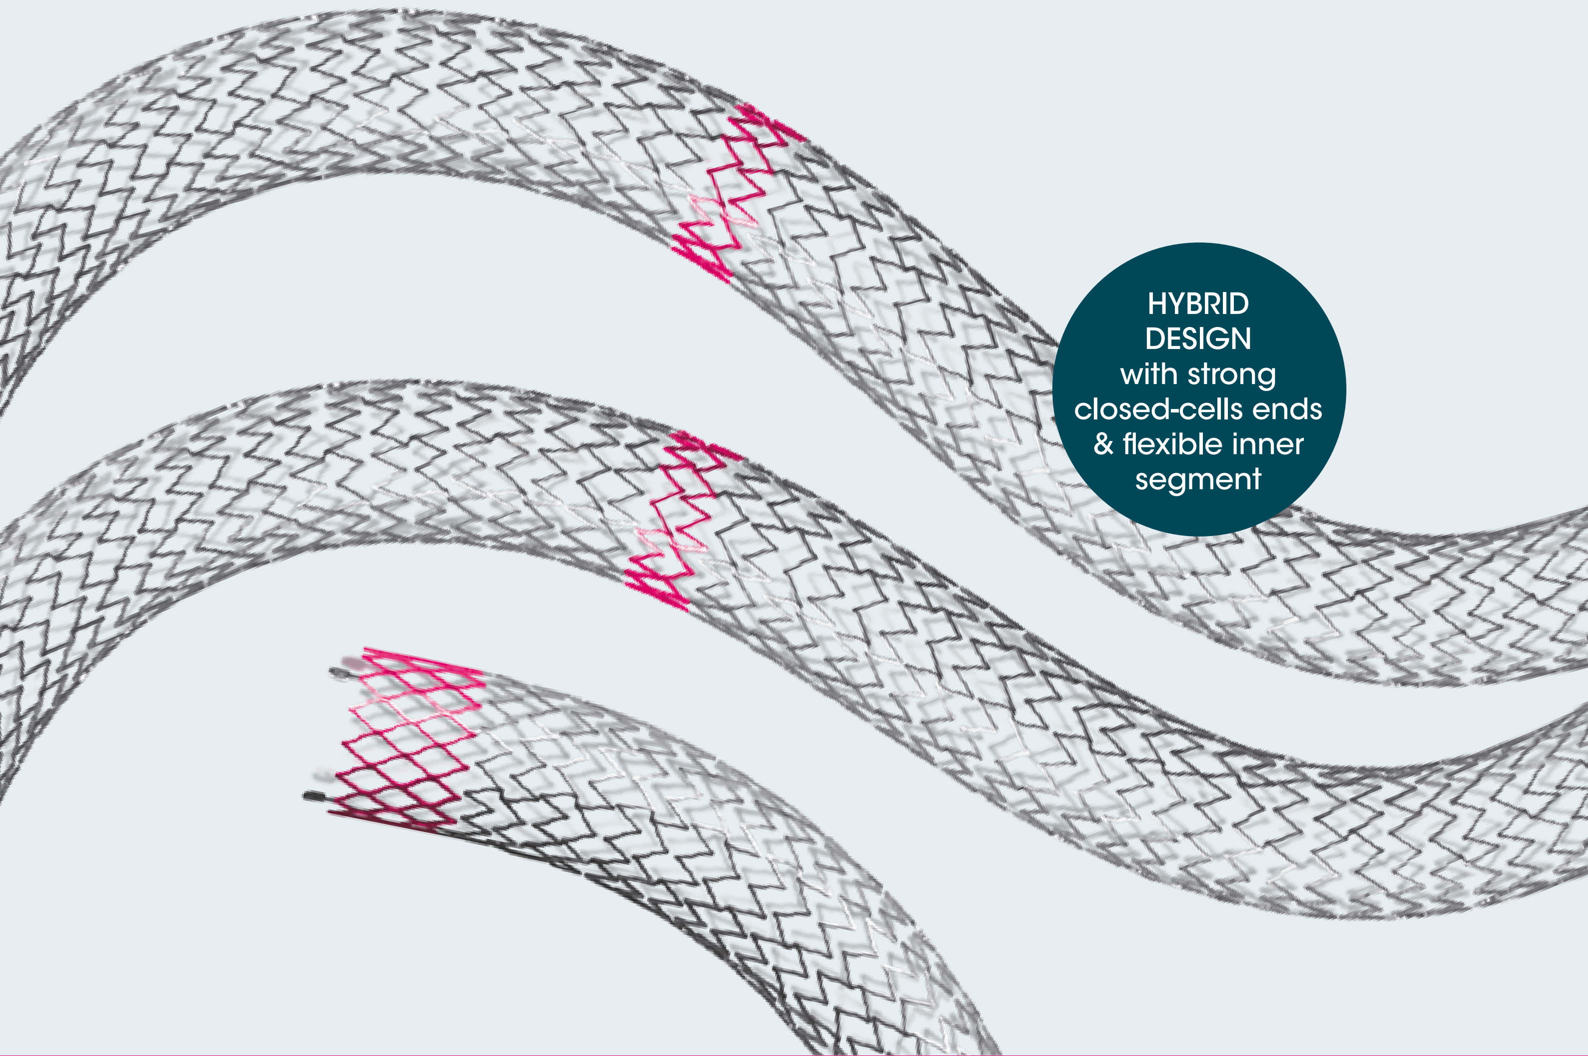
sinus-SuperFlex-635



SUPER-FLEXIBLE 6F STENT WITH A SINUS-MICRO-MESH HYBRID-DESIGN

- arterial
- 6F Ø device
- .035i guide wire
- hybrid-cell design
- NiTi nitinol stent
- radiopaque markers
- anti-jump technique



sinus-SuperFlex-635

SUPER-FLEXIBLE 6F STENT

FEATURES

Optimized vessel wall adaptation using Micro-Mesh design

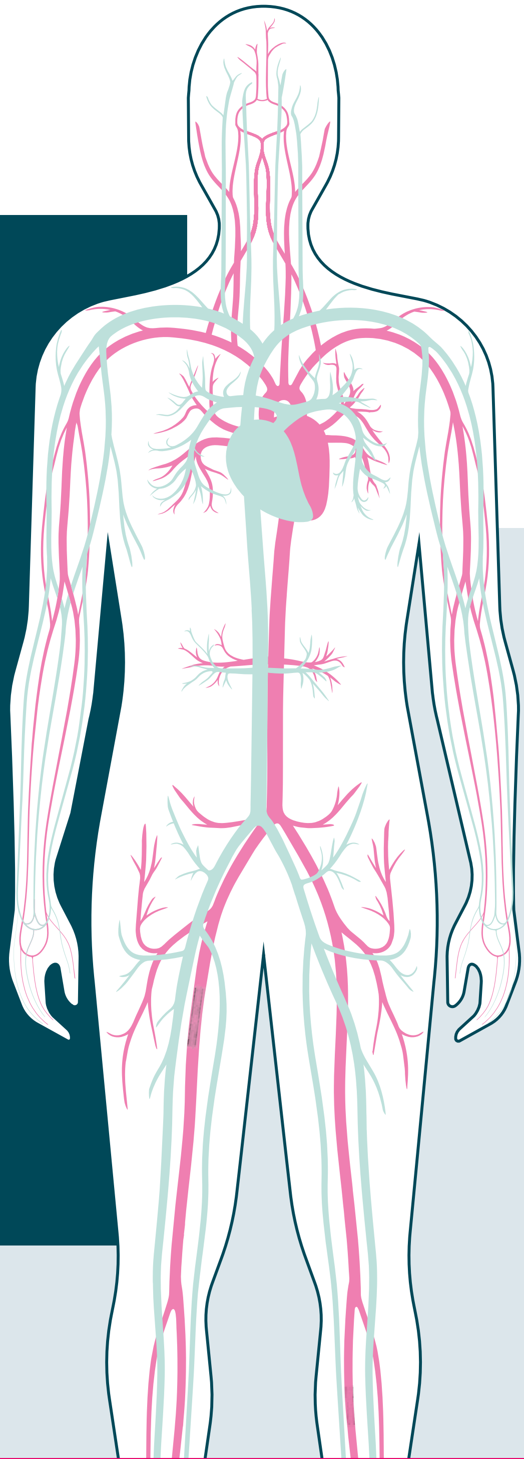
The sinus-structure offers superflexibility and perfectly mimics the contours of the vessel

---

Closed-cell design at the sten-tends enables vessel wall fixation during stent deployment and prevents stent migration

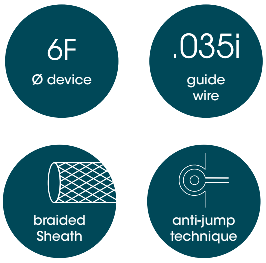
---

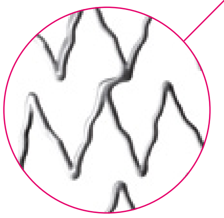
Electro-polishing for particularly smooth surfaces and reduced thrombogenicity*



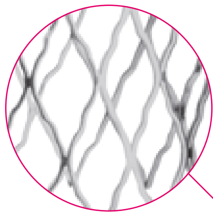
*Sources: 1 https://pubmed.ncbi.nlm.nih.gov/16095686/

Hybrid design combines closed-cell stent ends with high radial force, with a flexible inner segment made of open-cells



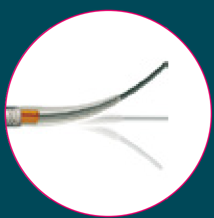


Flexible open-cell design in the inner stent segment

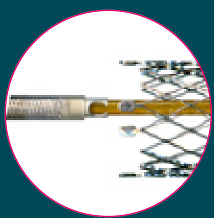


Closed-cell design at the stent ends for optimal vessel wall fixation

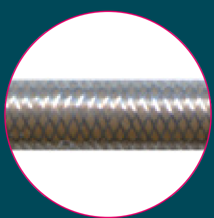
Flexible tip



Anti-Jump technique

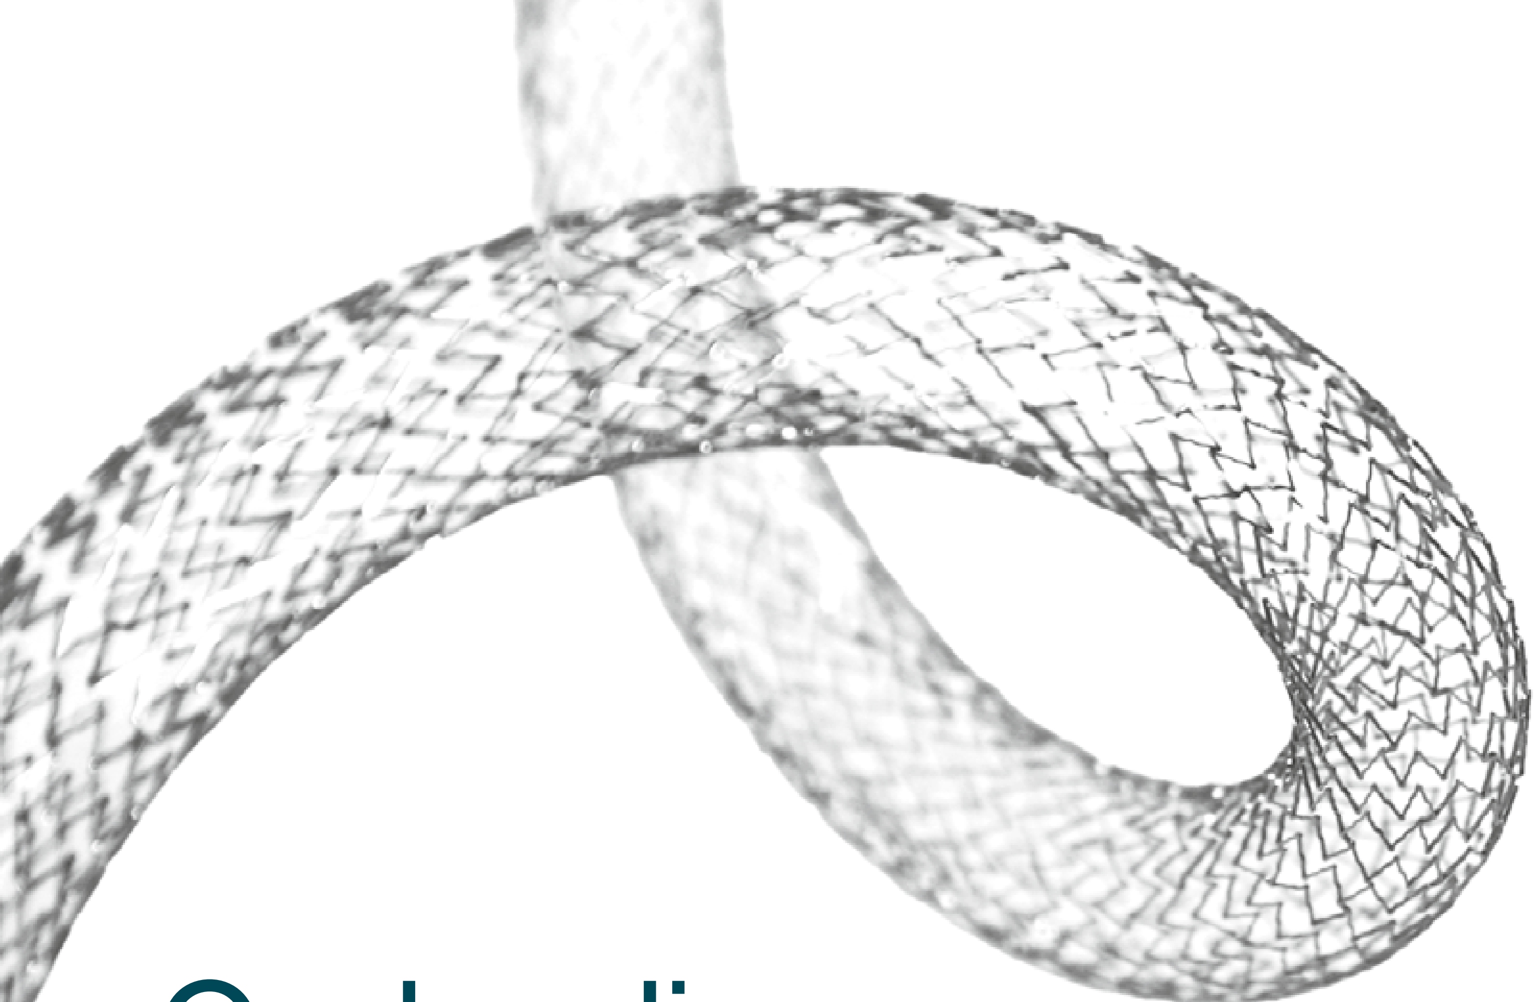


Braiding



THE 6F DELIVERY SYSTEM IS HIGHLY FLEXIBLE AND CAN TRAVERSE STRONGLY CALCIFIED STENOSES

- Optimized tapering of soft-tip to 0.035 inch guide-wire
- Flexibility and kink resistance for perfect steerability
- Effortless stent deployment
- Suited for cross-over technique



Oustanding flexibility:

Flexion
Twists and bends
are evenly covered

Torsion
The Micro-Mesh structure
adapts perfectly to
tortuous passages

Extension
Traction can be
easily absorbed

Contraction
The individual stent segments
are capable of absorbing
external contraction

Compression
Partial pressure can
be evenly distributed

ORDER CODES

6F / 75 & 120cm delivery system

Adapted to 0.035 inch guide wire

Box /1 unit
